

# **Download Cosmetic And Clinical Applications Of Botox And Dermal Fillers**

BOTOX® Cosmetic is the only FDA-approved treatment to temporarily make moderate to severe frown lines, crow's feet, and forehead lines look better in adults. At Quinn Clinics we provide a full range of non-surgical anti-ageing and cosmetic treatments for the face and body. At our Bristol clinic, popular cosmetic treatments such as BOTOX® and fillers are carried out by our team of doctors including founder Dr John Quinn, who has performed thousands of procedures and works with major pharmaceutical companies, training other practitioners. Perhaps nothing is more gratifying for cosmetic patients than having an immediate correction of rhytides or scars as a result of the injection of a dermal filler. Before and after photos of patients who have had injection of dermal fillers are shown below. No. This is a common misconception. Many medical professionals incorrectly assume they must attend many months of specialized advanced training in order to perform cosmetic injections such as BOTOX® and Dermal Fillers.
